

Huron Research Suite

Lobo Researchers,

The Huron Employee Compensation and Compliance (ECC) program that is replacing our current Banner Effort Certification process is officially **LIVE**. The system went live yesterday 3/30/2026 and Effort Coordinators are now able to complete pre-reviews of project statements.

As of this morning, research staff have successfully completed **125 pre-reviews** in the first 24-hours of the system being live. Certifiers (PI's) will now be able to begin effort certification one day after pre-review is completed.

We are continuing to offer training sessions and office hours for pre-reviewers and certifiers on a weekly basis, please visit our website for a full schedule and training videos.
